

We are delighted to offer the bSHaW Sexual Health Training Calendar for 2020/21

Being part of Buckinghamshire Healthcare Trust, we bring with us not only expertise but many years of training experience.

Our training covers many aspects of sexual health and we present the latest developments across a number of fields.

Our courses have been developed to enable all professionals working with adults and young people to gain skills and confidence to discuss relationships and sexual health in their workplace with the people they support in an open and honest manner.

We aim to make our courses as participatory as possible and all our courses are delivered in a safe and friendly environment. We embrace diversity and acknowledge and value the importance of a range of views and opinions.

We are happy to discuss the training needs of your organisation.
